

The ROAD From MANILA

A Workshop Revisiting the Tondo Foreshore Projects
January 7-22, 2006; Manila, Philippines
SCHOOL OF
ARCHITECTURE AND PLANNING, MIT

MIT PARTICIPANTS

Architecture

Non Arkaraprasertkul

Master of Science in Architectural Studies candidate; Fulbright and ACC Scholar. Lecturer at Thammasat University, Bangkok. Experience in art, history and creative use of computer graphics. Interests in methods of historical analysis that retain cultural and historical values of a city.

Dalia al-Husseini

Master of Science in Architectural Studies candidate; Fulbright Scholar. Previous studies in Architectural Engineering at the University of Jordan. Experience in surveys and policy development in low-income communities in Aqaba, and documentation of historic monuments. Interested in bottom-up decision models for low-income communities.

Emily Lammert

Master of Architecture candidate. Previous studies at Washington University. Experienced in field work with communities and graphic communication, as well as 'traditional' architectural employment. Interests focused on bridging the increasing disparity between rich and poor through critical reinterpretation of architecture's goals.

Michelle Petersen

Master of Architecture candidate. Previous studies in Fine Arts, Seattle, and abroad in Rome. Experience in art and visual communication, as well as varied employment throughout the service industry. Interests focused on the relationship between architectural theory and practice.

Reilly Rabitaille

Master of Architecture candidate. Previous studies in design, construction and planning. Extensive experience in CAD applications, as well as practical 'hands-on' field experience. Interests focus on perceptions of internationally significant piece of architecture by those who interact with it on a daily basis.

Urban Studies and Planning

Antonio Amado

Master of City Planning candidate in City Design and Development. Background in engineering in a wide variety of areas. Interests focus around a lifelong commitment to serving disadvantaged communities, by connecting planning and engineering in a cultural context.

Luis Canizo

Dual degree candidate in Master of Science in Real Estate Development and City Design; Fulbright Scholar. Extensive experience in real estate development and large urban civil engineering projects. Particular interests in producing housing for the low income in developing countries through private sector initiatives.

Poulomi Chakrabarti

Master of City Planning candidate in International Development and Regional Planning. Experience in policy studies in energy and environment and urbanization for agencies in India. Developed proposals for international development agencies including European Union and the World Bank. Interests are in sustainable urban development within the context of developing countries.

Ifeoma Ebo

Master of City Planning candidate in City Design and Development. Overseas experience in architecture and community design, and planning employment in the US. Interests are in the physical development of cities and the provision of housing for low income populations as an 'entrepreneur for the poor', with the eventual goal of working with international development agencies.

William Ho

Master of City Planning candidate in Housing, Community and Economic Development. Extensive experience in community work, including housing advocacy as well as helping communities articulate design and planning preferences. Interested in exploring skills for effective planning in today's shrinking and fast paced global environment.

Molly Markarian

Master of City Planning candidate in Housing, Community and Economic Development. Experience in neighborhood economic development and microenterprise, both in US and abroad. Interests focus on successful design and implementation of housing redevelopment initiatives.

Brittanya Murillo

Master of City Planning candidate in Housing, Community and Economic Development. Experience in community development focused on housing, home ownership and economic development in California. Interests in continued work in housing and community development after graduation.

Jan Schultheiss

Master of Urban Planning candidate; Harvard Graduate School of Design. Interests in housing and community development, in US and international contexts. Experience in neighborhood development corporations and community technology, as well as intern in Mayor's Office, City of Chicago.
